Sand Island Wastewater Treatment Plant: from 1976 to today and on to 2035

Speaker:

Tiow Ping Wong, Senior Environmental Engineer, R.M. Towill Corp.

Issue Covered:

The Sand Island WWTP was put into service in 1976 and there have been many additions, upgrades and expansions up to the present. There are several projects recently completed and several more in progress. Many more projects are in store between now and 2035 when full secondary treatment will be put into service. This presentation will describe the evolution of the Sand Island WWTP with emphasis on some of the recently completed projects and considerations for the planning/design of the upgrades required to get to 2035.
